

DEUTZ PowerBlue Promotion

PREMIUM ADDITIVE AT SPECIAL PRICES

DEUTZ SERVICE. We care. We support. We deliver.

DEUTZ PowerBlue – the smart solution for your engine

DEUTZ PowerBlue is the new alternative to your conventional AdBlue® / DEF solution. Special additives provide reliable protection of your SCR system – especially during the cold winter season. **Take advantage of our attractive promotional pricing and receive your personal DEUTZ gift!**

SPECIAL PROMOTION

NOV 2018 – FEB 2019

Best protection against crystallization

Reduce the risk of unplanned downtime and decrease your maintenance- and running costs with DEUTZ PowerBlue! To completely convert the urea solution in the SCR system of your engine, exhaust gas temperatures above 260°C are required - but in many applications those temperatures are not achieved! Through special active ingredients, DEUTZ PowerBlue improves the injection pattern of the urea solution into the exhaust gas flow. This improves urea conversion and significantly reduces the risk of crystallisation, even at low operating temperatures.

The engine company.

DEUTZ PowerBlue Promotion 2018/2019

Place your order of DEUTZ PowerBlue today and take advantage of our attractive special pricing between 01.11.2018 and 28.02.2019.
